DETAILED ACTION

Allowable Subject Matter

1. Claims 2-4, 6-18 and 20-35 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. With respect to claim 9, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a method of synthesizing pulses that produce a given selective excitation profile in a system including at least one of a two level quantum system and a subsystem describe by the spin domain Bloch equation, comprising the steps of: constructing left and right Marchenko equations from the selected bound states and norming constants; and solving said Marchenko equations to provide a pulse envelope in combination with the remaining limitations of the claim.
4. With respect to claim 22, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a method of generating a desired frequency dependent excitation in a system including at least one of a two-level quantum system and subsystem described by the spin domain Block equation using selective pulses for a given selective excitation profile corresponding to said desired frequency dependent excitation comprising the steps of: constructing left and right Marchenko equations from the selected bound states and norming constants; and solving said Marchenko equations to provide a pulse envelope in combination with the remaining limitations of the claim.
5. With respect to claims 2-4, 6-8, 10-18, 20, 21 and 23-35, the claims have been allowed due to their dependency on claims 9 and 22 above.
